Hopefully we will see some data next week. I will send it your way as soon as we get it.

Thanks,
Bret

Subject RE: FW: Tentative Sampling Schedule

Thanks for this information. Could you please send me the data as soon as it is available? We are hoping to select our participants the week of Dec. 15.

Hi Carrie,

Funny you should ask this question. We retrieved all of the passive soil-gas samplers yesterday and today and are shipping the samples to

Beacon for analysis tonight. They tell us that it takes approximately two weeks to get the results, but with the Thanksgiving holidays, I expect it will take a little longer. I would say we should have the preliminary results within three weeks. Hopefully, that will give you an opportunity to use the information to focus your sampling.

I will keep you posted.

Thanks,
Bret

FW: Tentative Sampling Schedule

Hey Bret -

Do you know when the new soil gas data for SE 14th, NE 15th, and Delfasco will be available? We would like to use this information to focus the exposure investigation a little more.

I have the September 2008 data for Delfasco.

Tentative Sampling Schedule

Jim and Cindy:

Things are starting to get back to normal following EPA's response to Hurricane Gustav and Ike. As a result, my contractor support is again available which means we can get back on track with conducting our investigations at the Delfasco, NE 15th Street, and SE 14th Street sites.

Attached to this e-mail is our tentative schedule for the field activities. Please review and let me know if you have any concerns/suggestions. You are welcome to observe/participate in any of the planned field activities if you like. Also, you had mentioned that we might be able to reserve the use of an office or small meeting space during the sampling so we can complete paperwork and package samples for shipment. If this is still available, I would like reserve some space between November 19 through 22 and again from December 1 through 4.

Please let me know if you have any questions or concerns.

Thanks,

Bret Kendrick
